

This light can be surface mounted in areas needing low level lighting and for general lighting on smaller boats. The screwed bezel is machined stainless steel 316 L and available with a frosted glass lens. This light uses the best quality materials and is designed for longevity and tested for water tightness to IP66. The DV12 is available with a MR11 lamp option as well as LED's with single and uniquely multi colour options. One colour can give mood lighting while the other more functional. It is available in cool white, warm white, red, blue as well as red/white and blue/white in 12 and 24 volt.
