

This light can be surface mounted or flush mounted using a weld-in insert in aluminum 5083 or stainless steel 316 L. It should be used for flood lighting on decks or masts. The bezel is machined stainless steel 316 L and available bolted to ensure a strong exterior for exposed areas or screwed for less exposed areas and a cleaner / smoother finish. It is available with a frosted or clear lens depending on how much light is required. This light uses the best quality materials and is designed for longevity and tested for water tightness to IP66. DV29 is available with a halogen maximum 100 watt lamp in 12 volt.
