

**T**his light can be surface mounted or flush mounted using a weld-in insert in aluminum 5083 or stainless steel 316 L. It should be used for high intensity functional flood lighting on decks or masts. The bezel is machined stainless steel 316 L and available bolted to ensure a strong exterior for exposed areas or screwed for less exposed areas and a cleaner / smoother finish. It is available with a clear lens. This light uses the best quality materials and is designed for longevity and tested for water tightness to IP66. DV30 is available with a 150 watt metal halide lamp in 120 or 230 volt. It is not an instant start up or re-strike, it requires approx. 2 minutes to reach its full brightness.
