

# Diffuser

The optical diffuser can be supplied with any of the SV14, SV10 or SV19 underwater light models for steel, aluminum or fibre-glass hulls. It can also be retro-fitted in any of the above existing lights. The optical diffuser will eliminate the individual beams of light without absorbing it and instead produce more of a flood effect.

Patent Pending

## *technical specifications*

Application for:	SV10, SV14, SV19
Glass Lens:	Heat resistant prismatic glass
Holder:	Aluminum
