

The Sea Vision SV 16 model utilizes a durable off road halogen lamp with 12 or 24 volt DC power and can be installed in the transom or the hull. Generally it should be installed in smaller boats and for the occasional light user. The vessel must be hauled out for installation although lamp change and any maintenance can be done in the water from within the hull.

SV16 technical specifications

Application for:	GRP/fiberglass/wood hulls
Lamp:	100 watt, 12 volt / 70 watt, 24 volt
Life length:	approx. 2,500 hours plus
Lumens:	100 watt - 2,640 / 70 watt - 1,500
Kelvin colour temp:	3000
Glass lens:	Borosilicate glass
Thickness:	9.5mm / 0.38"
Power supply:	12 VDC 5.7 amps running current 24 VDC 3 amps running current
Casing material:	Marine Bronze
Dimensions:	80 mm (3.15") x 144mm (5.67")
