

**T**his LED adaptation of the SV19 has been introduced due to the high demand for an LED light that can be serviced from the inside of the boat. This feature allows for any required servicing or repair of the LEDs to be completed with the boat in the water, a convenient feature. The domed lens magnifies and intensifies the LED light output to give a pleasant wide angled beam of light not normally associated with LEDs. This light is ideal for small and mid-sized boats, especially if they remain in the water and operates on 12 and 24 VDC systems.

## *SV19 LED technical specifications*

Application for:	GRP/fiberglass/wood hulls
Lamp:	9 Cree LED diodes
Life length:	10,000 hours plus
Kelvin colour temp:	6500
Glass lens:	Convex Crown Glass
Thickness:	23.5mm / 0.93" Thick 52mm / 2.1" Diameter
Power supply:	10-30 VDC 2.4 Amps Maximum
Casing material:	Marine Bronze / Marine Aluminum
Dimensions:	105 mm (4.13") x 189 mm (7.44")

Angles available:	Flush
Weight:	1.9Kg/4.2lbs
Code:	SV19 LED
Total shipping weight:	1.9 Kg / 5 lbs
Installation:	Recommended at least 10" (250mm) below the waterline between 3 - 6 feet (1 - 2 meters) apart. (80mm)
Colors:	white, blue
